

Dear Representative \_\_\_\_\_:

Re: House Bill 2409 Health Plan Coverage of Reproductive Health

As your constituent, I respectfully request you **OPPOSE** this unnecessary legislative mandate for abortion and contraceptive services. This bill purports to be in the interest of “low-income women, women of color,” etc...that don't have “access to, or resources, or information” regarding their reproductive health care. This is simply not true. Under existing law, all employer and individual health plans (including the state exchange) already cover abortion and contraceptives, as does Medicaid. The taxpayers of our country also provide \$500,000,000.00+ every year to Planned Parenthood to provide reproductive health care services, that include young and low-income and disadvantaged women.

This bill promotes the destruction of innocent human life and violates the fundamental right to freedom of conscience, contrary to the “absolute freedom of conscience in all matters of religious...belief...” that is a guaranteed protection under Amendment 4, Article 1, Section 11 of our state's Constitution.

Sincerely,

Name:
